

NAHEM SEGUIAS

{smart_contracts_developer}

SUMMARY

After working as a System Engineer for over 10 years, I wanted to expand my skill set to be able to work in more creative and meaningful projects.

Took a sabbatical year in 2021 to travel around the world, improve my skills at different programming languages, master blockchain, and learn about data analytics and finance.

I've been working full time in crypto as a smart contract developer for the last couple years, mainly in the Cosmos ecosystem but willing to explore others.

TECH SKILLS

Blockchain {

Rust & CosmWasm,
Solidity,
Rollups,
MEV,
Consensus mechanisms,
AMM & Concentrated Liquidity,
DeFi suite,

}

Engineering {

Python & Automation,
Security,
SQL,
GIT,
Machine Learning,
Routing & switching,

}

- Conduct thorough testing and collaboration with auditors.
- Support smart contracts integration with the front and back ends.

Terraform Labs (Terra) - Remote 2022-2023
SMART CONTRACTS DEVELOPER

- Use software development languages and tools to research, design, implement, manage, test, and evaluate software programs.
- Write, implement and test smart contracts in Rust & CosmWasm.

SIX (Swiss Stock Exchange) - Madrid 2018-2022
SYSTEM ENGINEER

- Troubleshoot escalated infrastructure issues.
- Plan and execute configuration changes during maintenance windows.
- Work on integration between stock exchanges, banks, brokers, etc.

SICE (ACS Group | Smart Cities) - Madrid 2017-2018
NETWORK ENGINEER

- Design and implement network solutions for smart traffic systems.
- Guarantee seamless integration of network solutions with existing platforms

Jump Trading (Jump_ | High Frequency Trading) - London 2015-2017
NETOPS ENGINEER

- Guarantee optimal operation and availability of an ultra low-latency hybrid network.
- Troubleshoot complex infrastructure issues and fine-tuned circuits in reaction to constantly changing markets.

Cambridge Broadband Networks (RF antennas) - Cambridge 2013-2015
CUSTOMER SUPPORT ENGINEER

- Provide high-level customer support to clients worldwide.
- Create, maintain, and improve business relationships with customers.

EDUCATION

Madrid Stock Exchange - Madrid, Spain 2021 - Incomplete
MSC IN AI FOR FINANCIAL MARKETS

- Trading Strategies & Algorithms.
- Cloud Computing for Big Data
- Deep Learning & Neural Networks.
- Blockchain.

360 GSP College - London, UK 2013-2014
SERVER ADMIN & CUSTOMER SUPPORT

- Cisco CCNA, Microsoft MCSA, and VMWare training.

Universidad Catolica Andres Bello - Caracas 2005-2011
MSC IN TELECOMMUNICATION ENGINEERING

- Graduated with honours.
- Top 5% of the class.
